

Astronomers of Verde Valley

Astronomers of Verde Valley is an amateur astronomy club that serves the communities of the Verde Valley, Arizona. Here, surrounded by the Minigus Mountains and the Red Rock country of Sedona, we are favored by the clear air and dark skies of the high desert. We have an enthusiastic and varied membership that includes scientists, professional astronomers, teachers, authors, students, and big-city refugees from all walks of life. Our mission is to inform, educate and entertain by providing a varied and interesting program of activities for our membership and the communities we serve. Our projects include educational programs and presentations by guest speakers and our members, practical telescope design and construction, public star parties, field observation of various astronomical events and trips to observatories and other space science venues.

Monthly Events

Program & Meeting Highlights

Our monthly meetings are always full of information and observing reports. The novice as well as advanced observer will be sure to enjoy our programs. Many of our members are becoming Astro Photographers and many of their pictures and techniques will be shown.

The public is welcome to attend any of our monthly meetings or star parties.

Be sure to follow our special events like the Messier Marathon, Tuzigoot Star Night, Night Under the Stars at Alamo Lake & Star Night at Kartchner Caverns.
